Re: Letter of Recommendation for Aslan Construction for their Exemplary Performance in regards to the City of Thornton's Lambertson Lakes Dam Rehabilitation Project, Project No. 04-455

To Whom It May Concern:

It is with great pleasure and appreciation for Aslan Construction's outstanding performance that I can recommend them for construction services.

The 1.7 million dollar Lambertson Lakes Dam was constructed by Aslan Construction in 2008- 2009. During that time, Aslan maintained exceptional quality of workmanship and consistently performed to a higher standard. I was sincerely impressed with their partnering attitude and desire to develop a quality long-term relationship while minimizing additional costs to the City of Thornton (Thornton). Their responsiveness to the needs of Thornton was outstanding.

This project had some difficulties in that one of Aslan's subcontractors was performing at a standard that was less than desirable, however, Aslan handled the situation appropriately, absorbed a considerable amount of aggravation and expense, while insulating Thornton from unsubstantiated claims that the subcontractor was pursuing.

Aslan Construction truly maintained a desire to avoid change orders and additional expense to Thornton throughout the course of the project. Thornton will continue to utilize Aslan's services and highly recommends them to other municipalities, government agencies, and private companies.

If you have any questions, or would like to discuss Aslan Construction's qualifications further, please feel free to call me at 303-538-7380.

Sincerely,

Jim Jensen
Contract Administrator
