To Whom It May Concern:

I am happy to recommend to you working with Aslan Construction, based upon their performance for the Town of Nederland building our new wastewater treatment plant.

The Town undertook a \$3.8 million design-build project to convert our old lagoons-based treatment system to a new mechanized plant. Aslan guided us on constructability of engineered plans and to accurately price the various elements of construction. The plant was built within budget, including a number of additional amenities that we were able to add to our plant, as well as absorbing unforeseen job costs.

We appreciated the company's solution-oriented, collaborative approach to our project. There were a number of challenges and unforeseen changes that came up in the construction phase, where Aslan showed an ability to offer reasonable and affordable solutions independent of engineering direction, which demonstrated an overall understanding of the work.

I believe these qualities contributed to the best project possible for the Town. Please feel free to contact me with any questions: [alishar@nederlandco.org](mailto:alishar@nederlandco.org) or (303) 258-3266.

Regards,

Alisha Reis  
Town Administrator
